DETAILED ACTION

Election/Restrictions

Newly submitted claims 46-55 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the apparatus could be used to carry out a deposition process rather than the etching processes of the instant method claims.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 46-55 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 4, 6, 10, 12-16, 21, 22, 24, 25, 33-43 and 46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "substantially" in claims 3, 4, 6, 10, 12, 13, 15, 16, 21, 33, 34, 38, 39, 41, 46, 48 and 52 is a relative term which renders these claims, and claims depend therefrom, indefinite. The term "substantially" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 44 and 45 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 5,846,883 issued to Moslehi.

Moslehi teaches processing a substrate in a reaction chamber by treating the substrate with gases to which RF energy has been coupled. The RF energy being provided by an RF powered antenna that is embedded within a flat chamber wall that faces the substrate. Moslehi teaches monitoring the process via the optical plug in the above-mentioned chamber wall. See column 4, lines 33-53.

Allowable Subject Matter

Claims 1, 2, 5, 7-9 and 17-20 are allowed.

Claims 10, 21, 33, 38 and 41 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 3, 4, 6, 12-16, 22, 24, 25, 34-37, 39, 40, 42, 43 and 46 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
